

Capileira

A fine volcanic outcrop with lots of easier and middle grade climbs. West facing and only a short walk from the north end of town.

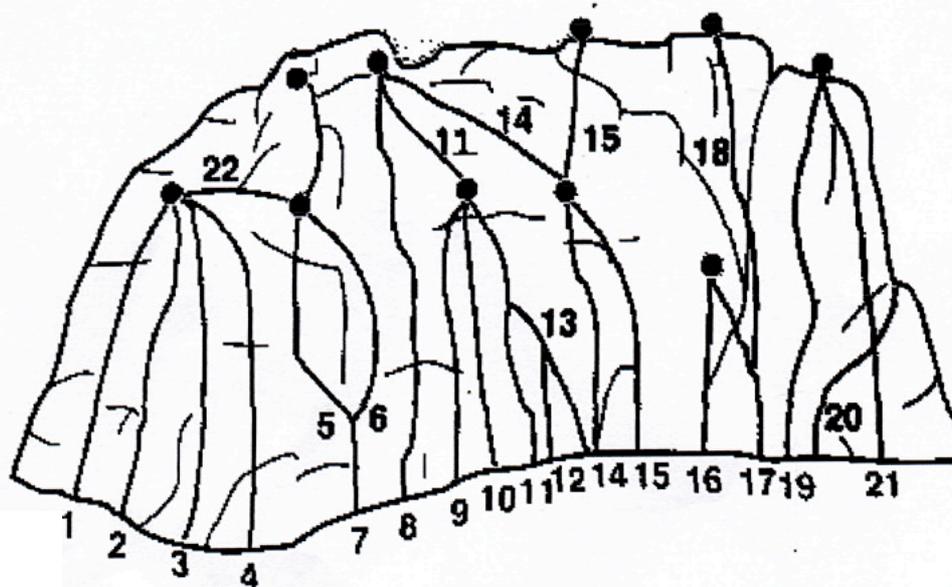

From the tourist information continue up the road for approx. 50m before taking a left fork along a pleasant street with bars shops and a bank. At the end of this turn left and right into a square with drinking fountains. (the bars here are the nearest to the crag). Exit from the square at its far end and proceed downhill for about 50m. Here turn right and follow the road northwards (in the direction of the mountains). Leaving the village the road becomes a dirt track. Take the footpath that forks right off the track, this leads to the crag in about 5 minutes.

There are 3 buttress for climbing.

1. As you approach along the path, there are 2 short climbs just before an easy gully. The right hand climb is 4 whilst the left hand climb is 3+.
2. The Slab. Between the first climbs and the main area, set on a slab about 20m above the path are two worthwhile slab climbs. Both start from the same point at the bottom left corner of the slab.
 - i. 4+ Step up and follow the right hand line of bolts. A good climb.
 - ii. 5+ Ascend the slab direct on poorly spaced protection.
3. The main area is above the ruin / goat pen. The route names are written at the base of the climbs.

Capileira Main Area

1. Travellers	4	12. Night of Insomnia	6b
2. I am Podrio	5	13. Gaston Jorobat	
3. Moon of August	6a	14. The Prairie	5
